

Test ID	Use Case	Expected Results	Instructions	Actual Results	PASS/FAIL	Out of Scope: Additional Feature Backlog
TC1.1	As a user, I want to easily understand the purpose of the site.	The title of the site is shown in the browser with a favicon.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. In the browser tab, check that the name of the site says "Kitchen Craft" 3. In the browser tab, check that there is a favicon.	Name of the site is shown, with a favicon.	PASS	
TC1.2	As a user, I want to easily understand the purpose of the site.	The introduction to the site is shown in the top banner.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. On the home page there is a banner which explains what Kitchen Craft is	The heading which includes the name of the website, as well as the blurb below it is clearly visible at the top to indicate what the website is for.	PASS	
TC2.1	As a user, I want to clearly view the website on Mobile, Tablet, and Desktop viewports.	The site is fully viewable and functional on Mobile, Tablet, and Desktop viewports.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Open developer tools 3. Click the toggle device toolbar 4. Click and drag responsive window to all viewport widths down to and including 300px 5. Ensure content layout is not compromised	All content structure and text flows well when reduced at the way down to a viewport width of 300px.	PASS	
TC3.1	As a user, I want to easily navigate the website so that I can find content quickly.	On desktop, there is a menu at the top of the page which indicates other pages the user can visit.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Hovering over a menu item clearly shows which item the user is selecting due to a hover effect 3. The menu items are clearly shown and explain their respective pages 4. Clicking on each menu item takes the user to the intended page 5. When logged in, the user controls are hidden in a dropdown that is listed under the user name 6. Clicking on the user name shows the options available to a logged in user	The mouse-over hover effect works as expected with each menu item turning a darker shade of purple. Each menu item is clear and visible, and all links work as intended, taking the user to the correct page. If logged in, the user sub-menu shows as expected when clicked on.	PASS	
TC3.2	As a user, I want to easily navigate the website so that I can find content quickly.	On tablet and mobile, there is a burger menu which allows the user to get around the site.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. On mobile/tablet, the burger menu is shown in the top right 3. Click on the burger menu to see a list of options combined with the options if you are logged in as a user 4. Click on each link individually to ensure each item takes the user to the intended page	The burger menu works on mobile and tablet. All links take the user to the intended page and work as expected. When logged in, the additional options are visible to the user.	PASS	
TC3.3	As a user, I want to easily navigate the website so that I can find content quickly.	Clicking the kitchen craft name logo takes the user to the homepage	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Follow each of the navigation links in the menu 3. On each page, click on the "Kitchen Craft" logo	Clicking the Kitchen Craft name on each page takes the user back to the homepage.	PASS	- Updating so that the icon image also links back to the homepage, not just the name.
TC4.1	As a user, I want to be able to see what kitchen products are for sale and how much they are.	Navigating to the products page takes the user to a page displaying product names, images, description and pricing.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Navigate to the products page 3. Scroll down to view the products	Every product clearly has a name, image, description and price.	PASS	
TC5.1	As a user, I want to be able to see all the community shared recipes	The recipes page shows a list of user submitted recipes.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Navigate to the recipes page 3. Scroll down to view all of the different recipes submitted on the website	The recipes page shows all the recipes submitted by different users	PASS	
TC5.2	As a user, I want to be able to see all the community shared recipes	The recipes in the recipes page shows which of the users in the community submitted the recipe.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Navigate to the recipes page 3. Each recipe submitted by a user shows the username of the user who submitted it	The tags of each user are clearly shown on each of the recipe cards on the recipes page.	PASS	
TC6.1	As a user, I want to be able to search the community shared recipes	At the top of the recipes page, there is a search bar. Searching for a recipe name returns only that recipe. Searching for an ingredient returns all recipes that contain that ingredient. Partial searches should still return results. The search bar should turn red if the user does not fill out any options. Clicking "Search" and hitting enter both allow the user to search once a term has been typed in.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Navigate to the recipes page 3. Click into the search bar 4. Type in a partial search term, e.g. "Potato" 5. Click "Search" or hit enter	The search bar is clearly visible at the top of mobile, tablet, and desktop. Clicking into the search bar highlights it so that the user can see where they are typing. When a user doesn't fill anything out, the search bar turns red. Using fractions of words still returns results, and in the example given, searching for "Potato" returned an recipe named "Potato Bake" as well as a number of recipes that contain potatoes in their ingredients list. Hitting enter and search both return the same results.	PASS	
TC7.1	As a user, I want to be able to see information about the different cuisines of the world.	The cuisines page shows a list of cuisines from around the world, with a little bit of information about each one. A little star should highlight the cuisine of the week, which is the featured cuisine on the home page. Hovering over the star on the cuisine page should show a tooltip which lets the user know that this is the chosen cuisine of the week.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Navigate to the cuisines page 3. Browse the page and reach about each cuisine	Navigating to the cuisines page shows a list of cuisines. Each one has it's own description. Only one of the recipes has a little star on the right hand side of the box. Hovering over the star shows a tooltip which says "Cuisine of the Week"	PASS	
TC8.1	As a user, I want to be able to register to the website so that I can share my own recipes	When logged out or not registered, an option to register is available to the user in the top navigation menu. The user can click this and fill out a basic form to register for the site.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log out of any previous sessions 3. Navigate to the "Register" 4. Fill out the form and Register as a new user	When not logged in, the "register" button is shown in the navigation for mobile and desktop. Clicking the register button takes the user to a page to fill out details in order to register for the website.	PASS	- Pre-approval process for new users, so that the user quality increases and likelihood of spam or unpopular recipes decreases.
TC8.2	As a user, I want to be able to register to the website so that I can share my own recipes	When logged in as a user, the "Add Recipe" option is available on the nav menu. This takes the user to a form to fill out a new recipe. When filling out the "Add Recipe" form, hitting submit will add a new recipe to the recipes page. When a page error is found, click on the home link to get back to the homepage.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into your account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the menu and click "Add Recipe" 5. Fill out the form and press submit 6. Navigate to the recipe page and find your new recipe 7. Click "Edit" 8. Update the recipe with new information 9. Click "Confirm Edit" 10. Navigate to the recipe page and check the edits were made 11. Click "Remove" on a recipe to delete the recipe 12. Click "Confirm Delete" to confirm that the recipe has been deleted	The "Add Recipe" button is clearly shown when logged in. Filling out the form then creates the recipe on the recipe page.	PASS	- Pre-approval process for new recipes submitted by the user. - A "new" tag is added to any newly submitted recipes for a week from their submission date.
TC8.1	As a user, I want to be able to register to the website if I encounter a page error	When a page error is found, click on the home link to get back to the homepage.	1. Open website in browser: https://kitchen-craft.herokuapp.com/404 2. Click on "Home" to navigate back to the main website	Hard to test from a user perspective as at the time of testing there are no error URLs found on the site, but navigating directly to the 404 page shows a landing page where the only link takes you back to homepage.	PASS	- Add a recipe search option to the 404 page which takes the user back to the recipes page.
TC10.1	As a registered user, I want to be able to log in to my account on the website	When not logged in or in a new session, the option to log in should be visible on the navigation.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into your account by clicking "Log In" 3. Fill out your username and password and hit enter	Navigating to the login page shows a empty form for filling out and logging into the user profile. Logging in with a pre-created username and password works as expected.	PASS	
TC11.1	As a registered user, I want to be able to view my profile, edit my details and change my password	When logged in as a user, on the profile page, the user can edit their profile, including updating name and email address. The profile page also allows the user to update their password.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into your account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the profile page 5. Click on "Edit Profile" 6. Update name or email 7. Click on "Submit Changes" 8. Click on "Change Password" 9. Update password 10. Click on "Submit Changes"	Editing the profile name or email then updates the name and email in the account profile page. Logging in with the new username after updating the username works as expected. Updating the password in the profile takes the user back to the profile page. Using a new password with the login works as intended and correctly logs in the user to their profile.	PASS	
TC12.1	As a registered user, I want to be able to add, edit and delete my own recipes	When logged in as a user, the "Add Recipe" option is available on the nav menu. This takes the user to a form to fill out a new recipe. When filling out the "Add Recipe" form, hitting submit will add a new recipe to the recipes page. Once a recipe has been made, the user can edit or remove recipes from the recipe page if they were the original authors.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into your account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the menu and click "Add Recipe" 5. Fill out the form and press submit 6. Navigate to the recipe page and find your new recipe 7. Click "Edit" 8. Update the recipe with new information 9. Click "Confirm Edit" 10. Navigate to the recipe page and check the edits were made 11. Click "Remove" on a recipe to delete the recipe 12. Click "Confirm Delete" to confirm that the recipe has been deleted	Adding a recipe using the form then correctly creates a recipe on the recipes page. Editing the recipe on the recipes page takes the user to a form to update the current data. Once data is added or edited in the form and submitted, these changes are correctly reflected in the recipe card on the recipes page.	PASS	
TC13.1	As a registered user, I want to be able to see all my recipes on my profile page	When logged in, on the profile page, if the user scrolls down they will find a full list of all the recipes that they have submitted in the past.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into your account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the profile page 5. Scroll down until you see "Your Recipes" 6. Check that the list of the recipes there is the same ones that you know to have submitted	Logging in and navigating to the profile page does show a list of recipes. The recipes submitted are the same ones that are shown in the profile user page.	PASS	
TC14.1	As an admin user, I want to be able to add, edit and delete cuisines	When logged in as an admin, on the cuisines page, there are options to edit, add, and delete cuisines. When editing and adding a cuisine, the user can fill out the name, description, and select if that will be the cuisine of the week.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into an admin account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the cuisines page 5. Click "Add" to add a cuisine 6. Update information in the cuisine and hit submit changes 7. Check that the new details for the cuisine have been updated on the site	Logging into an admin account then shows edit and delete buttons on the cuisines page. Clicking on the edit button gives the user the ability to update the text and descriptions, and select the cuisine for cuisine of the week. When a user toggles a pre-existing cuisine of the week, there is a fallback to make sure that there is always a cuisine of the week, and an error message appears at the top. Clicking on the delete button triggers a popup to confirm deletion of the new cuisine. Confirming this deletes the cuisine from the cuisines page.	PASS	
TC15.1	As the superuser, I want to be able to view and search the users page	When logged in as a superuser, the "Users" option shows in the menu. Searching a name or a username returns a user in the database.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into the superuser account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the users page 5. In the top search bar, type in the name of a user to search 6. Hit enter and see the results of your search	When logging in as a superuser, the "Users" page is clearly shown on the navigation as an additional option. Clicking on the users page takes the superuser to a table of users, with a searchbar at the top to find the appropriate user. Searching by both name and username returns results of users, as well as information if they're an admin, or if they're banned.	PASS	
TC16.1	As the superuser, I want to be able to edit admins and bans for users	On the users page, toggle options for banning a user (in red) and making a user an admin (in green) are shown for all users. Toggling the red ban option will not allow a user to login to the site. Toggling the green admin user allows the user to be an admin.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into the superuser account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the users page 5. Choose a user to ban 6. Toggle the red "Ban User" to the right 7. Choose a user to make into an admin 8. Toggle the green "Is Admin?" to the right	On the users page, toggling the ban user option then stops a user from logging into the site. As expected, red label appears on the login screen which indicates that the user is banned. Back on the users page as a superuser, toggling the admin setting on then gives access to users to edit the cuisines page and set the cuisines of the week. Toggling this on and off correctly allows for this permission on an admin user session.	PASS	
TC17.1	As the superuser, I want to be able to delete users	On the users page, deleting a user will remove that user from the database.	1. Open website in browser: http://kitchen-craft.herokuapp.com/home 2. Log into the superuser account by clicking "Log In" 3. Fill out your username and password and hit enter 4. Navigate to the users page 5. Choose a user to delete 6. Click Details and confirm deletion 7. Check that the user is gone from the user page	Deleting a user removes that user from the database.	PASS	- The old recipes currently stay on the site. The superuser/admin should be able to edit/delete all recipes so that any artifacts from old users can be deleted/updated.
